

City Water System Connection – Authorization Form

Please indicate below if you wish KDHE to connect your property to the City of Wichita municipal water supply. The city water connection must include a pressure regulator as part of the installation. The existing on-site well may be converted to an outside faucet for lawn and garden use. If you decide to connect to the City of Wichita water supply, we will contact you to make the necessary arrangements to proceed.

If you decline this offer, KDHE will **NOT** connect you to the City of Wichita municipal water supply and any alternative water source and/or future connection will be your responsibility. Bottled water service will be terminated upon refusal of the city water hookup.

Please return this authorization page indicating your decision to KDHE at:

KDHE Dry Cleaning Remediation Program, 1000 SW Jackson, Ste. 410, Topeka, KS 66612-1367

☐ **YES** I would like KDHE to connect my residence to the City of Wichita water supply.

☐ **NO** I decline KDHE's offer to connect my residence to the municipal water supply. I understand that by declining, KDHE will cancel bottled water service and will not provide any other alternative water source. I also understand that the groundwater beneath this property is contaminated and any future water connection will be my responsibility.
